

Complete Welding, Brazing and Cutting Kit

This gas equipment range has been designed for optimum performance, extra safety and consistent reliability.

Manufactured to the highest standards, the range includes single and multi-stage regulators, cutting torches, flashback arrestors, complete gas and welding outfits and a broad selection of accessories and options.

An ideal outfit for light duty cutting, heating and welding, making it ideal for engineers on the move.

The outfit provides a variety of equipment required for light duty cutting, heating and welding, presented in a useful, easy to carry toolbox. Its portable design and lightweight equipment make it ideal for engineering contractors, plumbers, auto shops, garages and people on the move. This pack is capable of cutting up to 3/4" (20mm) and welding up to 5/32" (4mm)

The Series 5000 regulators in the outfit are compact and portable and are ideally suited to lightweight jobs where a short cut or weld is needed. The Combi-Lite shank is constructed from a single piece of gun-drilled aluminium for lightweight operation, durability and manoeuvrability in tight spaces. The cutting attachment has silver-brazed joints for extra strength, and inline tubes for good operator sight-lines.

All gas regulators, torches, torch shanks and cutting attachments come with an exclusive five year conditional warranty.

£395.00 plus VAT and delivery

Optional Portapak Trolley - £104.00 plus VAT and Delivery
